Recall #: R1607 | PTH LEF NV TX OCS NTB16-054

Recall Date: 2016 May 23

Recall Description

The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.

Remedy

Nissan is currently awaiting parts to remedy the affected vehicles. Nissan will send you a second letter, when parts are available, asking you to bring your vehicle to a Nissan dealer for the remedy at that time. This repair is free of charge for parts and labor. In the meantime, if you believe there is an issue with the OCS system in your vehicle, you may bring your vehicle into the nearest Nissan dealer for service.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit [Nissan's website](#).
